

No More Flat Tires

0% Downtime = 100% Uptime

The Tire that Never Goes Flat

OTR's patent-pending NDX™ tire & wheel features OEM-approved treads, in popular sizes, designed for commercial turf equipment as well as utility and rough terrain vehicles. Sold as an assembly – tire and wheel included – it's a bolt-on replacement for stock tires and wheels that's easy to install.

OTR's game-changing, patent-pending tire & wheel LASTS OVER 2X LONGER than other airless options.

NDX lasts up to 2x longer than other airless tire options, even when carrying heavy loads and after sustaining damage. It just keeps rolling, no matter what, ensuring more value and a better ROI.

KEY FEATURES:

- No flat tires = NO downtime or loss of productivity.
- Long-lasting and ultra-durable, ideal for worksites.
- Exceptional traction, grip and handling on rough terrain.
- Comfortable ride – same or better than pneumatics.
- Wide contact patch enhances stability and braking.

An ECO-Friendly Mobility Solution

NDX tires reduce fuel consumption by up to 10%, making them an eco-friendly solution. Plus, tires lasts longer, resulting in less waste.

Air Ready

Though designed to operate completely airless and deliver an extremely smooth ride, air can be added to NDX tires for enhanced ride comfort.

NDX Warranty

The NDX warranty term extends to three (3) years from date of purchase. Coverage is terminated once tread depth reaches 3 mm (or 4/32"), as will be indicated by tread wear indicator (TWI) tabs located between the treads and on the sidewalls.

See warranty document for full details.

NDX Powersports

→ On OTR's figure-eight test track, a **1-1/2" hole was drilled into the sidewall** of the NDX tire. It was then placed under a 1,000-lb. load and driven for 1,000 miles with no degradation in performance.

NDX Commercial Turf

- Supports loaded grass catchers with no tire impact.
- Supports loads up to 880 lbs at 10-20 PSI.

1 flat tire every other week

=

26 flat tires annually

1 flat tire

=

2 hours of downtime

2 hours of downtime

=

52 hours of lost productivity annually

\$300

cost per incident
(lost productivity + labor)

=

\$7,800
in opportunity costs

Utility & Rough Terrain Vehicles:

10 vehicles in the average fleet = **\$78,000** lost annually

Zero-Turn, Riding & Stand-On Mowers:

4 vehicles in the average fleet = **\$31,200** lost annually
